

OBS Auto-Record – Test Checklist (Printable)

Tip: Temporarily set `PauseHoldTimeout` to 10–15s for quick iteration, then restore.

1) Auto-start → gym pause/hold → stop

- ☒ Enter **map** vs in-list opponent → recording starts, owned by mod.
- ☒ Enter **gym** → `PauseRecord()` + hold queued.
- ☒ After timeout → `StopRecord()` ; flags reset.

2) OBS started in middle of match

- ☐ Get in match with someone in list
- ☐ Open OBS
- ☐ Expect immediately start recording

3) Same opponent during hold → resume

- ☐ In **gym** with hold, re-enter **map** vs **same** ID before timeout.
- ☐ Expect `ResumeRecord()` ; `QueuedForStopping=false` ; no stop at old timeout.

4) Different opponent NOT in list during hold → stay paused

- ☐ In **gym** with hold, re-enter **map** vs **different** ID **not** in list.
- ☐ Expect no OBS calls; remain paused; stop after hold timeout.

5) Different opponent IN list during hold → stop & start new

- ☐ In **gym** with hold, re-enter **map** vs **different** ID in list.
- ☐ Expect `StopRecord()` → `StartRecord()` (new opponent); hold canceled.

6) External resume during hold → continue; next gym hold again

- ☐ In **gym** with hold, user **resumes** in OBS.
- ☐ Expect: hold canceled now; at **next gym**: `PauseRecord()` + new hold; stop at timeout.

7) External start → adopt after external pause+resume

- ☐ User **starts** in OBS manually; mod **does nothing**.
- ☐ User **pauses then resumes** in OBS → mod **adopts** (owned=true).
- ☐ At **next gym**: `PauseRecord()` + hold; stop at timeout.

8) Manual pause pre-gym → no hold at that gym

- ☐ User **pauses** in OBS **before** gym.
- ☐ Enter **gym** while paused → **no hold**.
- ☐ If user **resumes before next gym**, then **that** gym should hold.

9) Duplicate gym events → single hold

- ☐ Cause `whenInGym()` to run twice.
- ☐ Expect exactly **one** `PauseRecord()` and **one** active hold.

9) Short-hold stress

- ☐ Set hold to 2–5s.
- ☐ Exercise #2–#4 quickly; verify no stale holds after resume/stop.

10) External stop during hold

- ☐ In **gym** with hold, user **stops** in OBS.
- ☐ Expect flags reset; no double stop.

Quick Smoke

- ☒ #1 Auto start → gym hold → stop
- ☐ #2 Same opponent → resume
- ☐ #3 Different not-in-list → stay paused → stop
- ☐ #4 Different in-list → stop & start new
- ☐ #5 External resume → next gym hold
- ☐ #6 External start → adopt after pause+resume
- ☐ #7 Manual pause pre-gym → no hold
